**Power BI:** Power Query, Advanced Data Transformation, DAX, Data Modeling, Interactive Dashboards, KPI Development, Data Visualization, Drill-through Reports

**SQL:** SELECT, WHERE, DISTINCT, ORDER BY, GROUP BY, HAVING, JOINs, Aggregate Functions, Window Functions, Ranking Functions, Subqueries, Common Table Expressions (CTEs)

**Microsoft Office:** Excel, Word, PowerPoint, Outlook, Access

**Tools:** GitHub, Visual Studio Code, SQL Server Management Studio, Obsidian

## SELECTED DATA ANALYSIS PROJECTS

### Data Job Market Analysis Dashboard

*Power BI | Power Query | DAX | + 479K Job Postings*

- Built an interactive Power BI dashboard analyzing **479,000 + job postings** across job titles, salaries, employment characteristics, and geographic distribution.
- Transformed and prepared raw data using Power Query and developed analytical measures using DAX.
- Designed interactive reports with KPIs, filters, drill-through analysis, and business-focused visualizations.
- Analyzed salary benchmarks, job demand, work-from-home trends, job platforms, and degree requirements.
- Project link

### Data Science Salary Dashboard

*Excel | +32K Job Postings*

- Analyzed 32,672 data science job postings to identify salary trends, job-title distributions, employment types, countries, and job platforms.
- Built an interactive Excel dashboard using Pivot Tables, dynamic formulas, lookup functions, data validation, and data visualization.
- Developed KPI analysis including median salary, job count, country comparisons, and top job platforms.
- Transformed a large dataset into a structured reporting solution for salary and labor-market analysis.
- Project link

## FREELANCE EXPERIENCE

### Freelance Data Analyst

*Mostaql | Part-time, Project-based | Egypt*

- Completed two Excel VBA automation projects during university studies, alongside coursework, focused on reducing manual reporting effort for clients.
- Built a data-migration automation tool that reduced manual data-transfer time across sales representatives by over 40%, replacing repetitive manual entry.
- Automated a large-scale reporting workflow, cutting per-record processing time by over 60% and removing the need to manually search and filter large datasets by personal ID, which also reduced human error.
